ABOUT

Fourth-year Computer Engineering student at Gebze Technical University with hands-on experience in full-stack web development and backend engineering, built on a solid foundation in C/C++. I enjoy turning real operational needs into clean, secure and easy-to-use software, and I am looking to grow in DevOps, cloud technologies and embedded systems within a collaborative engineering team.

TECHNICAL SKILLS

Languages	C, C++, Java, Python, SQL, TypeScript
Backend	Node.js, Express, Spring Boot, Prisma ORM, REST APIs, JWT, bcrypt
Frontend	React (Vite), Tailwind CSS, Radix UI, Axios
Tools	Git / GitHub, Docker, ExcelJS, Agile workflows

EXPERIENCE

Software Engineer Intern

2026

Hasçelik

- Developed a full-stack internal management portal with Node.js, Express, TypeScript and React (Vite).
- Built secure RESTful APIs with Prisma ORM, JWT and bcrypt authentication, and added automated Excel data exports with ExcelJS.
- Designed responsive interfaces with Tailwind CSS and Radix UI, connected to the back end through Axios.

HIGHLIGHTS

Full-stack delivery
Scholar management platform built end-to-end during my internship (next page).

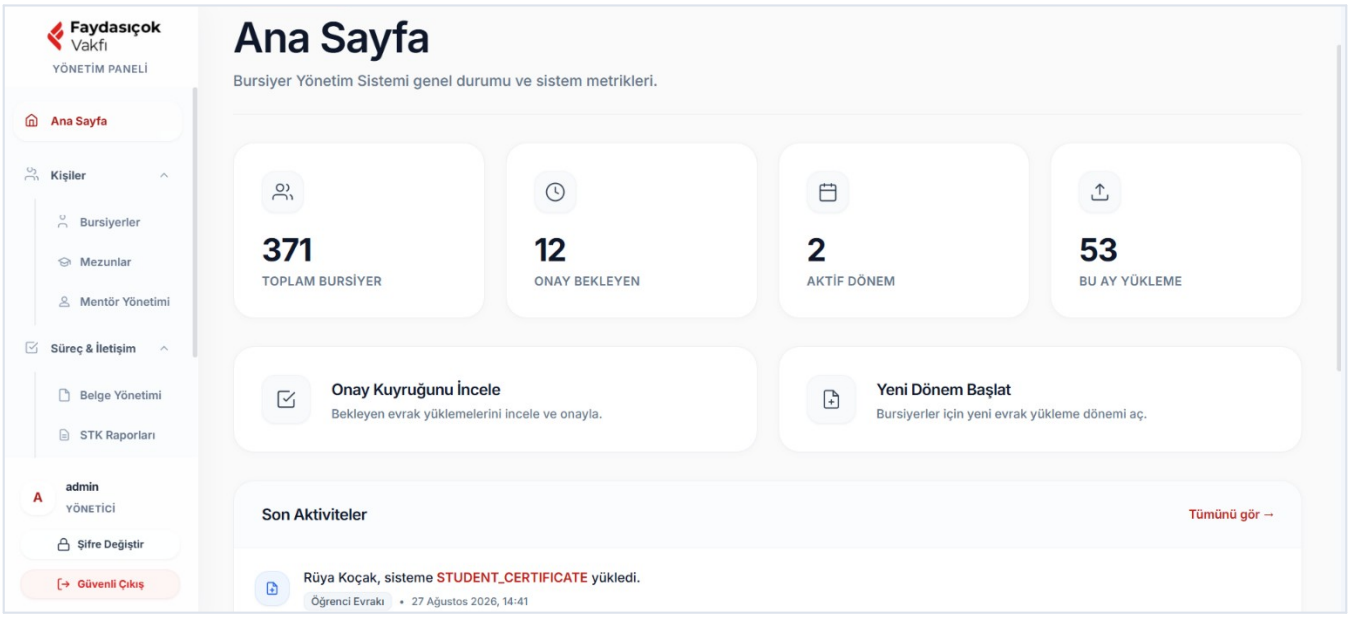

Teamwork
Backend developer in a 4-person Agile team; 5-person hackathon team.

International
Erasmus exchange at Mendel University in Brno, Spring 2026.

FEATURED PROJECT

Scholar Management System

Admin panel for Faydasıçok Vakfı · Hasçelik internship, 2026 · Full-stack developer

Admin dashboard: live metrics, quick actions and a recent-activity feed.

The problem

The foundation needed one place to follow its scholars, collect their periodic documents and review them, instead of tracking everything by hand.

What the system does

- Manages scholars, graduates and mentors in one panel.
- Document management and STK report sections.
- Opens document-upload periods for scholars.
- Approval queue for reviewing pending uploads.
- Dashboard metrics and a recent-activity feed.
- Secure admin login, password change and logout.

What I built

- REST API with Node.js, Express and TypeScript.
- Database layer and schema with Prisma ORM.
- JWT sessions and bcrypt password hashing.
- Automated Excel exports with ExcelJS.
- Responsive React (Vite) interface with Tailwind CSS and Radix UI, connected via Axios.

Node.js · Express · TypeScript · React (Vite) · Prisma ORM · JWT · bcrypt · ExcelJS · Tailwind CSS · Radix UI · Axios

MORE WORK

EasyOrder: QR-Based Ordering

Team project · Backend developer in a 4-person Agile team

A restaurant ordering system where guests scan a table-specific QR code and place their order from the table.

- Built the back end with Java and Spring Boot.
- Used Docker, Git/GitHub and Agile practices for a reproducible team workflow.

Java | Spring Boot | SQL | Docker | Git / GitHub | Agile

COMMUNITY & ACTIVITIES

Milli Yetkinlik Hamlesi Innovation Camp · Feb 2025	Worked in a 5-person team on ideathons and hackathons: developed solution proposals and presented them.
Google Developer Groups Community Volunteer · 2024–2025	Helped organize events and educational programs on Google technologies; handled participant orientation and forms.
Volunteer work ÇYDD · Marmara University	Supported the sales of donated clothing at ÇYDD and contributed to an e-book editing project at Marmara University.

EDUCATION & LANGUAGES

Gebze Technical University 2022 – Present	B.S. in Computer Science, GPA 3.0+
Mendel University in Brno Spring 2026	Erasmus exchange student
Languages	Turkish: native · English: B2
